## POULTRY HOUSES

### ACCREDITATION AND ORGANISATIONS

<b>CLIENT</b>	<b>Thomas Hempton</b>
<b>DESIGN ENGINEER</b>	<b>Moy park</b>
<b>CONTRACT VALUE</b>	<b>£210,000</b>
<b>CONTRACT PERIOD</b>	<b>10 weeks</b>

### DETAILS

This project involves the construction of 3 no. Grandparent breeder poultry units and all associated service buildings in Gortin, Co. Tyrone. The houses will hold between 6000 and 7000 pedigree hens, which will be used for breeding. Our part in the project involves ground works and earth moving, construction of all walls, floors and outside aprons, and installation of all drainage and services.

The client for the project is a private landowner, who will be consulted by Moypark on the requirements of the building. Moypark will eventually lease the building after completion.

Exterior walls were constructed with a deco-block, rather than a plaster finish. This leaves the building more aesthetically pleasing.

### ENVIRONMENTAL CONSIDERATIONS

All topsoil stripped from the site during the earth moving process was used to construct a bund around the perimeter. This will serve as flood protection in the unlikely event of the adjacent river rising.
