ACCREDITATION AND ORGANISATIONS

COCA COLA SUBSTATION

CLIENT	J&P Avax (NI) Ltd
DESIGN ENGINEER	J&P Avax (NI) Ltd
CONTRACT VALUE	£60,000
CONTRACT PERIOD	June 2006- August 2006

DETAILS

A major new manufacturing and bottling plant for Coca-Cola was built at the Knockmore Hill industrial estate, Lisburn to provide for Ireland.

To power the plant a new substation was constructed within the boundary of the plant. J&P Avax was the principal contractor for the project and took the substation to ground level before Alexander's commenced on site.

We constructed the control building superstructure including: Blockwork, precast roof slabs, trussed roof with tiled surface, door installation and internal finishes.

HEALTH AND SAFETY CONSIDERATIONS

On this project we had to work alongside other contractors during the construction period. Good communication with the other contractors was established to ensure smooth progress.
